1. GENERAL INFORMATION

This Report has been prepared in accordance with the Decision on publishing data and information of the bank published in the Official Gazette No. 125/2014 and 4/2015 and 103/2016. and Guidelines for Disclosure of Bank Data and Information Related to Asset Quality.

The bank operates under the name Expobank a.d. Belgrade (hereinafter: the Bank). The Bank 's registered office is in Belgrade, Dalmatinska 22.

The document is mostly complementary to the Notes to the financial statements for 2020.

Responsible persons:

Borislav Strugarevic – Chairman of the executive Board

Ernst Bekker – Deputy Chairman of the Executive Board

Aleksandr Kashtalap – Member of the Executive Board

2. BANK'S RISK MANAGEMENT STRATEGY AND POLICIES

The Risk Management Strategy and Policy of Expobank a.d. (hereinafter: the Bank), the Bank defines a unique system for managing the risks to which it is exposed in its operations.

The Bank's business strategy is to develop its market share in Serbia, placing its products with clients, legal entities and individuals, without deviating from the adopted appetites for risks.

The main risks to which the Bank is exposed in its operations are:

- Credit risk
- Risk of exposure (concentration)
- Country risk
- Investment risk
- Market risks
- Liquidity risk
- Interest rate risk
- Operational risks
- Other risks (settlement / delivery risk, counterparty risk, legal risk, business compliance risk, reputation risk, strategic risk, residual risk, information system risk, CVA risk and money laundering and terrorist financing risk, etc.)

The subject of the Risk Management Policy are risks for the independent assessment of which the Risk Management Department is responsible, as well as the management of bad assets, which is under the jurisdiction of the Receivables Collection Department, and the details are regulated by special acts of the Bank.

Management of compliance risk, money laundering and terrorist financing risk, reputational risk, strategic risk and other risks are defined by special acts of the Bank.

Information system risk management is also regulated by special acts of the Bank in accordance with the Decision on minimum standards for information system management of a financial institution.

Credit risk is the possibility of negative effects on the financial result and capital of the bank due to non-fulfillment of the debtor's obligations to the bank.

Residual risk is the possibility of negative effects on the bank's financial result and capital due to the fact that credit risk mitigation techniques are less effective than expected or their application does not sufficiently reduce the risks to which the bank is exposed.

Dilution risk is the possibility of negative effects on the financial result and capital of the bank based on the reduction of the value of purchased receivables due to cash or non-cash liabilities of the previous creditor to the debtor.

Concentration risk is a risk that directly or indirectly arises from the bank's exposure to the same or similar source of risk or the same or similar type of risk.

Concentration risk relates to:

- large exposures (exposure of the bank to one person or group of related parties amounting to at least 10% of the bank's capital);
- groups of exposures with the same or similar risk factors, such as economic sectors, geographical areas, types of products, etc.;
- credit protection instruments, including maturity and currency mismatches between large exposures and credit protection instruments of those exposures.

The bank's exposure to one person is the total amount of receivables and off-balance sheet items related to that person or group of related parties (loans, investments in debt securities, equity investments and participations, issued guarantees and avals, etc.).

The investment risks of a bank include the risks of its investments in other legal entities and in fixed assets and investment property.

Country risk is the risk related to the country of origin of the person to whom the bank is exposed, ie the risk of possible negative effects on the bank's financial result and capital due to the bank's inability to collect receivables from this person due to political, economic or social circumstances, the country of origin of that person.

Country risk includes the following risks:

- political and economic risk, which means the possibility of incurring a loss due to the bank's inability to collect receivables due to restrictions set by acts of state and other authorities of the debtor's country of origin, as well as general and systemic circumstances in the country;
- transfer risk, which implies the possibility of incurring a loss due to the bank's inability to collect receivables denominated in a currency other than the official currency of the debtor's country of origin, due to restrictions on payment of obligations to creditors from other countries in certain currencies. countries of origin.

Settlement / delivery risk is the possibility of negative effects on the bank's financial result and capital based on outstanding transactions related to debt or equity securities (excluding repo and reverse repo agreements and securities lending and borrowing agreements) where there is a mismatch between the moment of payment and delivery or due to non-fulfillment of the obligation of the other contracting party for free delivery transactions on the agreed due date / delivery date.

Counterparty credit risk is the possibility of negative effects on the Bank's financial result and capital due to non-settlement of the counterparty's obligation in the transaction before the final settlement of the cash flows of the transaction, ie settlement of monetary obligations under that transaction.

Foreign exchange credit risk represents the probability that the Bank will suffer a loss due to non-performance of the debtor's obligations within the agreed deadlines, which arises due to the negative impact of the depreciation of the dinar exchange rate on the debtor's financial condition.

Operational risk is the risk of possible negative effects on the bank's financial result and capital due to unintentional and intentional omissions in the work of employees, inadequate internal procedures and processes, inadequate management of information and other systems in the bank, as well as unforeseen external events. Operational risk includes legal risk and does not include reputational and strategic.

Legal risk is the risk of possible negative effects on the financial result and capital of the Bank due to penalties and sanctions of the competent regulatory body or arising from litigation based on non-compliance with contractual and legal obligations.

Market risks are the possibility of negative effects on the financial result and capital of the bank based on changes in the value of balance sheet items and off-balance sheet items of the bank that occur due to market price movements.

Foreign exchange risk is the risk of negative effects on the financial result and capital of the Bank due to changes in the exchange rate, and the Bank is exposed to it due to items kept in the banking book and trading book.

Commodity risk is the risk of the possibility of negative effects on the financial result and capital of the bank based on losses within positions in commodities due to movements in commodity prices on the market.

Price risk represents the risk of the possibility of negative effects on the financial result and capital of the bank based on changes in the prices of securities that are allocated to the trading book.

Liquidity risk is the possibility of negative effects on the financial result and capital of the bank due to the inability of the bank to meet its due obligations, due to:

- withdrawal of existing sources of financing, ie inability to obtain new sources of financing (liquidity risk of sources of funds), or
- difficult conversion of assets into liquid assets due to market disturbances (market liquidity risk).

Interest rate risk is the risk of possible negative effects on the financial result and capital of the Bank based on positions in the banking book due to changes in interest rates.

The risk of compliance of the bank's operations is the possibility of negative effects on the financial result and capital of the bank due to failure to comply with the law and other regulations, business standards, procedures to prevent money laundering and terrorist financing and other procedures, as well as other acts governing banks, in particular, it covers the risk of regulatory sanctions, the risk of financial loss and reputational risk.

Money laundering and terrorist financing risk is the risk of possible negative effects on the bank's financial result, capital or reputation due to the bank's use (direct or indirect use of the bank's business relationship, transactions, services or products) for money laundering and / or terrorist financing. The risk of money laundering and terrorist financing arises especially as a consequence of failing to harmonize the bank's operations with the law, regulations and internal acts of the bank which regulate the prevention of money laundering and terrorist financing, ie as a consequence of mutual inconsistency of its internal acts.

Reputational risk is the possibility of negative effects on the bank's financial result and capital due to the loss of public confidence, ie the unfavorable public attitude towards the bank's operations, regardless of whether there is a basis for it or not.

Strategic risk is the possibility of negative effects on the financial result or capital of the bank due to the lack of appropriate policies and strategies, and their inadequate implementation, as well as due to changes in the environment in which the bank operates or lack of appropriate response to these changes.

Legal risk is the risk of negative effects on the bank's financial result and capital based on court or out-of-court proceedings related to the bank's operations.

2.1 ORGANIZATION OF THE RISK MANAGEMENT FUNCTION

The implementation of the Risk Management Strategy is the responsibility of the competent bodies of the Bank and the organizational units that implement and participate in the risk management system as well as the organizational units that manage the Bank's bad assets.

The competencies of individual organizational units are regulated by the Rulebook on the organization and systematization of the Bank's operations. The Bank's Assembly, the Board of Directors, the Executive Board, the Bank's Business Monitoring Committee (Audit Committee), the Assets and Liabilities Management Committee (ALCO Committee) and the competent committees of the Bank that make decisions on approving the Bank's placements have competencies. Bank of Serbia, the Bank's Articles of Association and decisions of the Bank's Board of Directors.

Assembly

- adopts the business policy and strategy of the Bank which define the business goals of the Bank for a period of at least three years;
- adopts the Bank's Articles of Association and adopts amendments to the Bank's Articles of Association and Articles of Association;
- adopts the financial report of the Bank and decides on the use and distribution of the realized profit, ie coverage of the loss;
- decides on the capital increase, ie on capital investments in another bank or other legal entities, as well as on the amount of investments in the Bank's fixed assets and investment property;
- appoints and dismisses the President and members of the Board of Directors of the Bank;
- decides on status changes and termination of the Bank;

- decides on the acquisition and disposal of high value assets, ie assets whose market value at the time of the decision represents at least 30% of the book value of assets stated in the last annual balance sheet;
- adopts the rules of procedure and decides on other issues, in accordance with the law and the Bank's Articles of Association.

Board of directors

- convenes sessions of the Bank's Assembly;
- prepares draft decisions for the Bank's Assembly and is responsible for the implementation of those decisions;
- adopts the proposal of the Bank's business policy and strategy and submits them to the Bank's Assembly for adoption;
- adopts the risk management strategy and policy, as well as the bank's capital management strategy;
- determines the general business conditions of the Bank, as well as their amendments;
- elects and dismisses the President and members of the Executive Board of the Bank;
- elects and dismisses members of the Audit Committee, the Credit Committee and the Assets and Liabilities Management Committee;
- determines the amounts up to which the Executive Board of the Bank may decide on placements and borrowings of the Bank and decides on placements and borrowings of the Bank through those amounts;
- gives prior consent for the Bank's exposure to each individual or group of related parties exceeding 10% of the Bank's capital, or for increasing this exposure over 20% of the Bank's capital;
- supervises the work of the Executive Board of the Bank; establishes a system of internal controls and monitors its efficiency;
- adopts the Bank's internal audit program and plan and methodology of its work;
- reviews external and internal audit reports on the results of the performed audit, as well as reports on the activities and work of internal audit, and approves the annual report on the adequacy of risk management and internal control of the Bank;
- adopts quarterly and annual reports of the Bank's Executive Board on the Bank's operations, including quarterly reports on risk management and submits the adopted financial report to the General Meeting for final approval;
- approves the annual Report on the process of internal assessment of the Bank's capital adequacy to be submitted to the National Bank of Serbia;
- adopts the rules of procedure on its work and on the work of the Audit Committee, the Credit Committee and the Assets and Liabilities Management Committee;
- adopts the Bank's recovery plan and monitors the implementation of the Recovery Plan in case of its activation;
- notifies the National Bank of Serbia and other competent authorities of identified irregularities;
- determines the internal organization, ie the organizational structure of the Bank that ensures the division of duties, competencies and responsibilities of employees in a way that prevents conflicts of interest and provides a transparent and documented decision-making and implementation process;
- adopts the policy of salaries and other incomes of the bank's employees;
- proposes to the General Meeting of the Bank decisions on the acquisition of own shares, on the sale of shares, ie shares in a related party;
- makes proposals for the distribution of net profit and submits them for adoption to the Bank's Assembly;
- makes, on the proposal of the Executive Board of the Bank, decisions on write-off of fixed assets, write-off of suspicious and disputable receivables, provided that the Board of Directors may transfer part of its powers to the Executive Board, up to the limit determined by a special Decision of the Board;
- proposes to the Assembly the amount of investments in fixed assets and investment real estate, as well as the sale of fixed assets of higher, significant value (real estate owned by the Bank);
- upon the proposal of the Executive Board, decides on the purchase and sale of fixed assets and investment property, within the amount of funds determined by the Assembly of the Bank, which by their value do not fall within the competence of the Assembly;
- makes decisions on the transfer and / or sale of the Bank's receivables, with the possibility to transfer part of these powers to the Executive Board by a special Decision;
- adopts the business continuity plan as well as the disaster recovery plan, which enable the smooth and continuous functioning of all significant systems and processes of the Bank, as well as the limitation of losses in emergency situations;
- performs other tasks in accordance with the Bank's Articles of Association.

Members of the Bank's Board of Directors are responsible for the above activities as well as decisions made in risk management, as well as for the accuracy of all reports on operations, financial condition and results of operations of the Bank sent to the Bank's shareholders, the public and the National Bank of Serbia.

Executive Board

- executes the decisions of the Bank's Assembly and the Bank's Board of Directors;
- proposes to the Board of Directors the business policy and strategy of the Bank, as well as the strategy and policy for risk management and capital management strategy of the Bank;
- implements the business policy and strategy of the Bank by making appropriate business decisions;
- implements the risk management strategy and policies, as well as the Bank's capital management strategy by adopting risk management procedures, ie for identifying, measuring and assessing risks, and ensuring their implementation and reports to the Board of Directors on these activities;
- analyzes the Bank's total loan portfolio from the point of view of the Bank's exposure to credit risk;
- approves and proposes to the Board of Directors the Bank's Recovery Plan;
- activates and implements the Bank's Recovery Plan based on consideration of early warning indicators, market situation and financial position of the Bank;
- analyzes the risk management system and reports at least quarterly to the Bank's Board of Directors on the level of risk exposure and risk management;
- decides on facilities and borrowings of the Bank up to the amount determined by the Board of Directors of the Bank and approves the amount of calculated value adjustments on a monthly basis;
- decides, with the prior approval of the Bank's Board of Directors, on any increase in the Bank's exposure to a person related to the Bank and notifies the Bank's Board of Directors;
- ensures the security and regular monitoring of the Bank's information technology system and the Bank's treasury operations;
- informs the Board of Directors of the Bank on all actions that are not in accordance with the regulations and other acts of the Bank;
- submits an overview of business activities, balance sheet and income statement of the bank to the Bank's Board of Directors at least once during the business quarter;
- without delay informs the Board of Directors of the Bank and the National Bank of Serbia of any deterioration in the financial condition of the Bank or the existence of a risk of such deterioration, as well as other facts that may significantly affect the financial condition of the Bank;
- ensures that all employees are acquainted with the regulations and other acts of the Bank which regulate their work obligations;
- adopts rules of procedure for its work;
- decides on all issues that are not within the competence of the Assembly and the Board of Directors of the Bank;
- decides on the Bank's participation in reorganization proceedings and other proceedings against companies that are debtors of the Bank;
- makes a decision on the establishment, merger, acquisition and termination of the organizational parts of the Bank, in accordance with the acts on the internal organization of the Bank;
- organizes the work and manages the work of employees in the bank and adopts acts on the systematization of jobs and the schedule of direct executors;
- appoints and dismisses employees in jobs with special powers and responsibilities and determines their salaries;
- proposes to the Management Board to make a decision on the procurement, ie purchase and sale of fixed assets and investment real estate whose value at the time of purchase and / or sale does not fall within the competence and decision-making of the Assembly;
- makes a decision on interest rates as well as all decisions on changes to the same;
- within the limit determined by the Decision of the Board of Directors, makes decisions on write-off of fixed assets, write-off of suspicious and disputable receivables proposed by the Bank's bodies responsible for making such proposals, including proposals of the Commission for inventory and assessment of fixed assets and receivables;
- in accordance with the Decision of the Board of Directors, makes decisions on the transfer and / or sale of the Bank's receivables;
- is responsible for the implementation of the business continuity plan as well as the disaster recovery plan, as well as for the training and acquaintance of employees with their role and responsibilities in the event of emergencies;

- is responsible for changes to the business continuity plan as well as the disaster recovery plan in line with business changes, including changes in products, activities, processes and systems, changes in the environment, as well as the Bank's business policy and strategy;
- is responsible for regular testing of the business continuity plan as well as the disaster recovery plan, with adequate documentation of test results and their inclusion in the reporting of the Bank's Board of Directors;
- ensures the implementation of the process of internal capital adequacy assessment and its compliance with the Bank's business policy and strategy.

Bank Monitoring Committee (Audit Committee)

- analyzes the annual reports and other financial reports of the Bank that are submitted to the Board of Directors of the Bank for consideration and adoption;
- analyzes and adopts proposals of strategies and policies of the Bank related to risk management and the system of internal controls, which are submitted to the Board of Directors of the Bank for consideration and adoption;
- analyzes and monitors the implementation and adequate implementation of adopted strategies and policies for risk management and implementation of internal control systems;
- report at least once a month to the Board of Directors on its activities and identified irregularities, as well as to propose ways to eliminate these irregularities, ie improve policies and procedures for risk management and implementation of internal control systems;
- at the proposal of the Board of Directors or the Executive Board of the Bank or the external auditor of the Bank, evaluates the investments and activities of the Bank.

Assets and Liabilities Management Committee

- analyzes and monitors the Bank's balance sheet on a monthly basis from the point of view of security:
- · maturity matching of assets and liabilities,
- liquidity and solvency,
- · business security and profitability and
- monitors monthly developments in the Bank's balance sheet and income statement and proposes measures to increase the Bank's profitability:
- interest rate, commission and fee policies of the Bank,
- protection of the Bank from market risks (interest rate and currency risk);
- analyzes the quality of the Bank's assets from the point of view of collectability of loans and interest and proposes to the Executive Board of the Bank solutions and necessary measures to improve the quality of assets;
- analyzes changes in the liabilities of the Bank's balance sheet and proposes to the Executive Board of the Bank solutions and necessary measures to improve the quality of liabilities, from the point of view of:
- volume of deposits,
- the need for recapitalization, i.e. issue of the Bank's shares,
- justification of the issue of long-term and short-term securities of the Bank;
- monitors the indicators of early warning of the threat to the activities and financial position of the Bank and in accordance with the defined steps in the Recovery Plan, reports the Executive Board of the Bank
- considers the new development plans of the Bank and their impact on the balance sheet, ie assets and liabilities of the Bank;
- considers the implementation of the Bank's annual plans;
- submits to the Executive Board of the Bank reports on the balance and changes in assets and liabilities and proposes measures and activities for adjusting the maturity structure, maintaining liquidity, risk management, increasing profitability and other reports.

Credit Committee

- responsible for making decisions on approving all types of dinar and foreign currency loans, guarantees, letters of credit and other forms of collateral, based on the Bank's internal acts, within the prescribed decision limits, and in accordance with the Law on Banks and decisions of the National Bank of Serbia;
- submits monthly reports to the Executive Board on:
- volume of approved loans,
- the amount of approved loans,

- other reports related to the work of the Credit Committee.
- performs other tasks as ordered by the Executive Board of the Bank.

Risk management function, an independent business function responsible for risk management, which:

- proposes to the Executive and Management Boards a risk management strategy and policy;
- proposes to the Executive Board risk management procedures;
- develops models and methodologies for identifying, measuring, mitigating, monitoring and controlling risks;
- monitors, identifies, measures, assesses the Bank's exposure to risks in accordance with regulatory requirements and internal acts, including monitoring of bad assets and limits defined by the Recovery Plan;
- reports to the competent bodies of the Bank on risk management, in accordance with the procedures for regular reporting of the Bank's bodies on risk management.

The function of controlling the compliance of business and the risk of money laundering and terrorist financing is in charge of:

- identification and monitoring of the bank's compliance risk and for the management of that risk, which in particular includes the risk of regulatory sanctions and financial losses, as well as reputational risk;
- at least once a year identifies and assesses the main compliance risks of the Bank's operations and proposes plans for managing those risks, on which it prepares a Report which is submitted to the Executive Board and the Bank's Monitoring Committee;
- identification and monitoring of money laundering and terrorist financing risks in order to minimize negative effects on the bank's financial result, capital or reputation. It shall assess the Bank's exposure to this risk at least once a year and, if necessary, more frequently, and shall inform the Bank's Executive Board thereof.

Internal audit function

- provides the Board of Directors of the Bank with an independent and objective opinion on matters subject to audit;
- performs advisory activities aimed at improving the existing system of internal controls and operations of the Bank:
- applying a systematic, disciplined and documented approach to evaluating and improving the existing way of risk management, control and process management, assists the Bank's Board of Directors in achieving its goals;
- assesses the adequacy and reliability of the Bank's internal control system and the Bank's compliance function;
- ensures that risks are appropriately identified and controlled;
- identifies weaknesses in the operations of the Bank and its employees, as well as cases of non-fulfillment of obligations and exceeding of authority and prepares proposals for eliminating these weaknesses, as well as recommendations for their prevention;
- regularly prepares reports on internal audit activities and submits them to the Bank's Board of Directors, as well as to the Bank's Business Monitoring Committee.

Bad asset management function

- proposes to the Executive Board procedures for managing bad assets;
- implements activities, authorities and responsibilities related to early identification of potential problematic facilities
- precisely defines the activities, powers and responsibilities related to communication with debtors belonging to the portfolio of problem claims;
- undertakes activities and measures, and harmonizes the dynamics of their implementation, depending on the assessment of the debtor's capacity to settle liabilities to the bank, ie the assessment of the financial condition / creditworthiness of the debtor / credit protection provider and the number of days late in settling the debtor's liabilities;
- reports to the competent body of the bank (Commission for monitoring the collection of receivables) on the efficiency and effectiveness of the implementation of collection activities and measures for the management of bad assets (including the explanation of the choice of certain measures).
- This function is divided into an organizational part whose responsibility is to take risks when it comes to early detection of potential problematic facilities and an organizational part whose responsibility is to monitor and collect problematic receivables or manage bad assets.

Objectives of the Bank's risk management system:

- maintaining the Bank's risk profile at the level of the Bank's predetermined risk appetite;
- ensuring the stability of the Bank and maximizing the return / risk ratio for the Bank;
- ensuring a sufficient level of regulatory capital in accordance with the Bank's risk appetite, and redistribution of residual capital in accordance with the risks assumed by the Bank;
- adequate reporting to the competent bodies of the Bank on risk management in the Bank;
- developing the necessary systems / infrastructure / methodologies for risk identification.

The basic principles of risk management are as follows:

- the existence of specially defined processes for managing all types of risks to which the Bank is exposed in its operations;
- clearly defining the competencies and responsibilities of all organizational units involved in the risk management system;
- clear organizational separation of basic functions within the risk management system: risk-taking functions, independent risk assessment functions, decision-making functions, support functions, collection functions, reporting functions and independent control and supervision functions;
- · parallel and synchronized application of regulatory and internally defined risk management limits;
- implementation of adequate procedures for identification, assessment, monitoring, mitigation and control of risks, as well as setting up an adequate system for reporting on risk management.

The following subsystems are regulated within the Bank's comprehensive risk management system:

- credit risk management
- market risk management (trading book risks and foreign exchange risk),
- liquidity risk management,
- interest rate risk management,
- operational risk management,
- risk management in the process of introducing new products and services,
- risk management arising from the engagement of external associates (outsourcing)
- calculation of capital adequacy,
- internal controls of the risk management system
- management of the Bank's non-performing assets

Through specially adopted documents, the Bank's organizational structure, the Rulebook on systematization and organization of jobs, the categorization of the Bank's business, the List of managerial positions, etc. established an appropriate organizational structure adapted to the needs of the risk management system, ie the needs of managing all risks to which the Bank is exposed in its operations.

2.2 COVERAGE AND CHARACTERISTICS OF THE RISK REPORTING SYSTEM, AND METHOD OF MEASUREMENT AND RISK MITIGATION TECHNIQUES

The Bank reports on all types of risks: credit risk, including residual risk, impairment risk, settlement / delivery risk, as well as counterparty risk, concentration risk, which includes the risk of the Bank's exposure to one person or group of related parties, investment risk , country risk, market risks, which include interest rate, foreign exchange and other market risks, operational risk, liquidity risk, compliance risk of the Bank, strategic risk and other risks, in accordance with NBS decisions, internal policies and procedures, etc.

2.2.1. CREDIT RISK MANAGEMENT

Credit risk management is based on the application of NBS regulations in the field of credit risk management: Decision on risk management, Decision on classification of on-balance sheet assets and off-balance sheet items and Decision on capital adequacy.

The credit risk management process defines the organizational parts and bodies of the Bank that are responsible for taking over, independent assessment, decision-making, support, collection, and independent control and supervision within the credit risk management process at the level of individual placements.

Organizational parts of the Bank responsible for taking credit risk at the level of individual placements:

- Legal and natural persons Business sector with a network of branches,
- Banks and other financial institutions Asset Management Division.

The organizational part of the Bank responsible for independent credit risk assessment at the level of individual placements is:

• Credit Applications Assessment Division

The organizational part of the Bank responsible for independent assessment and credit risk management at the portfolio level is:

• Risk Management Division

The bodies of the Bank responsible for deciding on the approval of placements and the limits for deciding on the approval of placements are defined by a special decision of the Board of Directors of the Bank.

Organizational parts of the Bank in the function of supporting the credit risk management process of individual placements:

- Sector for Human Resources and Legal Affairs,
- Support Affairs Sector,
- Sector for Information Systems and Infrastructure,
- Financial control sector

Monitoring and collection of problematic receivables, ie management of bad assets is organized within the Sector for collection of receivables, which consists of two departments, namely the Department for collection of receivables of private individuals and the Department for collection of receivables of legal entities and monitoring of collateral and sales.

Organizational parts of the Bank in the function of independent control and supervision over the risk management system:

- Internal Audit Sector,
- Sector for control of compliance of the Bank's operations and prevention of money laundering.

The following participate in credit risk management at the level of the Bank's portfolio:

- Executive and Management Board of the Bank
- Risk Management Division
- all organizational units of the Bank in whose competence are tasks related to approval and monitoring facilities

By monitoring and identifying credit risks at the portfolio level, the Bank, by analyzing the structure and characteristics of the portfolio, timely identifies factors that may lead to an increase in credit risk.

Identification of credit risk at the level of the Bank's portfolio is performed for legal entities through the internal rating system on a scale from 1 to 9; for individuals based on arrears and product type; for banks based on an external credit rating or the rating of the country in which the parent bank has its registered office.

Internal reporting and external reporting according to the regulatory approach are carried out in the Financial Control Sector and in the Risk Management Sector.

Credit risk monitoring, a group of placements with similar characteristics in terms of credit risk, is conducted by monitoring the portfolio as a whole and by individual segments. Monitoring at the Bank level is carried out in the Risk Management Department with the participation of other competent organizational units of the Bank.

Internal reporting related to credit risks covers the following areas:

- portfolio quality portfolio quality reports contain a detailed opinion on the portfolio structure and focus on concentration indicators
- credit classification credit classification by risk categories and rating is done at least quarterly. A breakdown by portfolio segment is needed to provide valuable insight in terms of risk sources
- loan impairment loan impairment analysis is considered important as an indicator of portfolio quality and a means of identifying sources of loan deterioration
- Large Debtors The analysis of large engagements focuses on significant concentrations towards specific clients, as well as regulatory compliance.

The Risk Management Department informs the Executive Board and the Management Board on a monthly basis on the quality of the portfolio, proposing measures for protection against increased credit risk.

As of December 31, 2020, the bank's portfolio has the following structure:

Table 2.2.1.1 Structure of the distribution of exposures according to the remaining maturity

Table:	Structure of the	distribution of exp	posures based on th	e remaining matur	ity
		up to three			
Exposure class	up to a month	months	up to a year	up to five years	over five years
1. State and central bank	2,779,897	235,933	98,840	137,506	6,401,894
2. Banks	224,528	0	0	0	0

More details on the loan portfolio were presented by the bank in Part 8.

18.1.1. CREDIT RISK MITIGATION TECHNIQUES

The Bank adjusts credit risk weighted assets for the effects of the use of collateral in the form of financial assets by applying a simple method if the conditions for recognition of a credit protection instrument are met, in accordance with the provisions of the Decision on Bank Adequacy.

Eligible collateral in the form of financial assets are cash and cash equivalents deposited with a bank, debt securities, shares or convertible bonds, gold, balance sheet netting.

The bank may use guarantees / guarantees as eligible instruments of intangible credit protection, if the provider of intangible credit protection is eligible in accordance with the provisions of the Decision on the capital adequacy of the bank.

Valuation and management of credit protection instruments are defined by the Bank in an internal act - Methodology for calculation of capital requirements for credit risk and other counterparties.

Table 2.2.2. Exposure by exposure classes after application of credit risk mitigation techniques

Exposure class	Gross exposure	Value adjustment, provisions and required reserve	Net exposure	Non- material credit protection instruments	Material credit protection instruments (simple method)	Effects of application of credit protection instruments	Net exposure after application of credit protection instruments

19.1.1. LIQUIDITY RISK MANAGEMENT

Liquidity risk implies the risk of negative effects on the bank's financial result and capital due to the bank's inability to meet its due obligations due to withdrawal of existing sources of financing, ie inability to obtain new sources of financing (liquidity risk of sources of funds) and difficult conversion of assets into liquid assets. due to market disturbances (market liquidity risk).

The level of the bank's liquidity is expressed by the liquidity ratio, which represents the ratio of the sum of the Bank's first and second tier liquid receivables, on the one hand, and the sum of the Bank's demand liabilities, without agreed maturity and the Bank's liabilities, on the other hand.

The Bank adopted the act "Liquidity Risk Management" which defines in more detail the liquidity risk management system to which the Bank is exposed in its operations, as well as techniques for measuring / assessing liquidity risk:

- analysis of regulatory liquidity reports,
- GAP liquidity analysis which monitors the Bank's liquidity by significant currencies (currencies that participate in the Bank's total portfolio with over 5%, namely RSD and EUR), as well as other currencies (USD, CHF and cumulatively other currencies),
- monitoring the liquidity coverage ratio (LCR),
- · development of stress tests that monitor the effects of different scenarios on liquidity trends,

- analysis of the impact of the introduction of a new product on liquidity risk,
- preparation of the Bank's Business Plan in case of unforeseen events as well as the Bank's Recovery Plan.

The competent authorities of the Bank have also adopted the Methodology for the development of the GAP liquidity, as well as the appropriate internal limits that are continuously monitored and analyzed. The Risk Management Division monitors regulatory and internally defined indicators on a daily, weekly and monthly basis, which is reported by the Bank's Executive Board, the ALCO Board and the Bank's Assets Management Division.

1.1.1. INTEREST RATE RISK MANAGEMENT

The Bank manages interest rate risk in accordance with the act "Interest Rate Risk Management" which defines the system and methodologies of interest rate risk management, competencies and responsibilities of system participants, but also controls that are undertaken in order to operate the system as efficiently as possible.

The subject of interest rate risk management is all positions in the banking book that may cause a negative effect on the Bank's result and capital due to changes in interest rates.

In order to manage interest rate risk exposure, the Bank uses the GAP interest rate methodology. Internal limits are defined by the Decision of the competent bodies of the Bank, they are regularly monitored and analyzed. The Risk Management Department informs the ALCO Board and the Bank Asset Management Department on a monthly basis.

As an integral part of the interest rate risk assessment, the Bank conducts stress tests of the effects of changes in interest rates. In determining the exposure to interest rate risk in the banking book and the limit of this risk, the Bank assesses the effects of interest rate changes on the financial result of the bank (income statement), as well as on the economic value of the bank, applying the test - standard interest rate shock. is exposed.

1.1.2. MARKET RISK MANAGEMENT

Market risks represent the possibility of negative effects on the bank's financial result and capital based on changes in the value of balance sheet items and off-balance sheet items of the bank that arise due to market price movements.

Market risks include foreign exchange risk, price risk on the basis of debt securities and on the basis of equity securities and commodity risk:

- The Bank has defined the foreign exchange risk management system through the "Foreign Exchange Risk Management" act. Based on daily reports on the bank's foreign exchange risk indicator, stress tests and analysis of the impact of the introduction of new products on the bank's foreign exchange risk, the exposure to this risk is regularly monitored and assessed.
- Monitoring of price risk based on investments in securities is defined by the act "Risk management of investments in financial instruments" which monitors investments both at the individual level and at the level of the portfolio of financial instruments. The subject act defines the monitoring of settlement / delivery risk, counterparty risk but also price risk.
- The Bank does not invest in commodities so it is not exposed to commodity risk.

The Risk Management Division monitors the regulatory-defined indicator as well as internally defined limits on a daily, weekly and monthly basis, which is reported by the Bank's Executive Board, ALCO Board and the Bank's Assets Management Division.

1.1.3. OPERATIONAL RISK MANAGEMENT

The Bank's operational risk management structure is based on the "three levels of defense" model, ie:

- The first level of defense includes all organizational units of the Bank, each of which is directly responsible for controlling and minimizing operational risk within its business activities in accordance with the standards and procedures of the Bank.
- The second level of defense includes the Risk Management Division, which develops and provides methodologies, tools and guidelines related to operational risk management, which will be applied at the level of all organizational units for the purposes of operational risk management.
- The third level of defense is Internal Audit, which is responsible for ensuring at an independent level that operational risk management is effective, appropriate and fully implemented.

The subject of operational risk management is aimed at identifying critical processes and types of operational risks arising from these processes, regardless of whether the processes are periodic or frequent, manual or automated, related to products, communication, systems or people.

The Risk Management Department establishes mechanisms for the proper application and implementation of methodologies, calculation of capital requirements for operational risk, measurement and control of risk through the risk self-assessment and control (RCSA) process and monitoring of key risk indicators (KRI), as well as the use of IT applications for operational risk management. The Sector is also responsible for the training of the Bank's employees, in order to adequately manage operational risk in all relevant organizational units of the Bank.

By analyzing the results of these components of operational risk, an attempt is made to define procedures and actions that will achieve the minimization of costs caused by operational risk.

Operational risk management also considers the risks arising from the introduction of new products as well as the risks arising from activities entrusted by the Bank to third parties. The subtypes of operational risk are legal risk and IS risk.

The Risk Management Department informs the Executive Board of the Bank on a weekly and monthly basis, and in case of extreme events immediately after their occurrence and National Bank of Serbia as well.

2. BANK'S CAPITAL

The Bank adopts the Capital Management Strategy and Plan (hereinafter: the Strategy) in order to provide such a level and structure of capital and available internal capital that can support the expected growth of placements, future sources of funds and their use, dividend policy and any changes in the minimum amount of capital. prescribed by the Decision on Capital Adequacy.

The main goal of the Bank is to maintain at all times a strong capital base that will enable it to:

- compliance with regulatory requirements set by the National Bank of Serbia;
- maintaining the ability to continue its business on a going concern basis;
- to support business development and maintain flexibility in order to take advantage of potential business opportunities
- increase market share and ensure financial stability;

The Bank continuously manages capital, especially through:

- 1) Prescribed limits
- 2) Monitoring and reporting
- 3) Capital planning
- 4) ICAAP

2.1. LIMITS

The bank sets limits in terms of the absolute amount of capital and relative to the risk assets (where the bank distinguishes between regulatory / binding limits and internal limits or early warning limits). During the monitoring, the bank is obliged to report to the management if the bank approaches the internally prescribed limits.

The bank is not designated as a systemically significant bank, and it is not necessary to calculate the protective layers of capital for a systemically significant bank and a globally systemically significant bank.

3.2. MONITORING AND REPORTING

The Financial Control Department reports on a monthly basis to the Assets and Liabilities Management Committee on the amount and changes in the amount of regulatory capital, risk assets and the Bank's capital adequacy ratio.

The Financial Control Sector prepares capital adequacy projections for the remaining months of the current year on a quarterly basis. They are handed over to management in order to ensure that the Bank is in a position to achieve its objectives and regulatory capital adequacy ratio. As a result, the Bank's Capital Plan may be adjusted.

3.3. CAPITAL PLANNING

In order to ensure the optimal level of capital in the medium and long term, the Bank conducts capital planning. Capital planning is done within the Financial Control Sector. In capital planning, the Bank should cover a minimum of three years.

Once a year, the Financial Control Sector prepares the Capital Plan on the basis of the appropriate Business Plan, which is approved by the Board of Directors. The Business Plan (usually three years) and the Capital Plan adequately cover the projected volume growth for loans and deposits, results and corresponding ratios, as well as future sources of financing and their use.

3.4. ICAAP

The bank is obliged to carry out the process of internal capital adequacy assessment (ICAAP), ie to determine the total internal capital requirements in accordance with its risk profile, as well as to determine the available internal capital and perform its distribution.

The Bank regulates this issue in more detail by an act of the Internal Capital Adequacy Assessment Process, and in accordance with the adopted risk management framework, ie the Risk Management Strategy, ie risk management policies. The process defined by it is based on the process of identification and measurement, ie risk assessment, whereby the Bank analyzes all risks to which it is exposed or may be exposed on the basis of operations. The act defines the manner of determining materially significant risks, as well as the manner of calculating internal capital requirements

The Bank considers ICAAP to be an extremely important process for capital management purposes.

Podaci koji se odnose na kapital banke

(u hiljadama dinara)

Redni br.	Naziv pozicije	Iznos
	Osnovni akcijski kapital: elementi	
1	Instrumenti osnovnog akcijskog kapitala i pripadajuće emisione premije	8,549,095

2. Povezivanje pozicija u raščlanjenom bilansu stanja i pozicija u obrascu PI-KAP

Redni br.	Naziv pozicije	Iznos	Izvor podataka u skladu s referencama iz 1. koraka
	Osnovni akcijski kapital: elementi		
1	Instrumenti osnovnog akcijskog kapitala i pripadajuće emisione premije	8,549,095	
1.1.	od čega: akcije i drugi instrumenti kapitala koji ispunjavaju uslove iz tačke 8.OAK	5,671,608	a
1.2.	od čega: Pripadajuće emisione premije uz instrumente iz tačke 1.1. tj. iznos uplaćen iznad nominalne vrednosti tih instrumenata	2,877,487	b
2	Dobit iz ranijih godina koja nije opterećena nikakvim budućim obavezama, a za koju je skupština banke donela odluku da će biti raspoređena u osnovni akcijski kapital		
3	Dobit tekuće godine ili dobit iz prethodne godine za koju skupština banke još nije donela odluku da će biti raspoređena u osnovni akcijski kapital koja ispunjava uslove iz tačke 10. st. 2. i 3. za uključivanje u osnovni akcijski kapital		
4	Revalorizacione rezerve i ostali nerealizovani dobici	283,903	g
5	Rezerve iz dobiti i ostale rezerve banke, osim rezervi za opšte bankarske rizike	151,672	d
6	Rezerve za opšte bankarske rizike		
7	Učešća bez prava kontrole (manjinska učešća) koja se priznaju u osnovnom akcijskom kapitalu **		
8	Osnovni akcijski kapital pre regulatornih prilagođavanja i odbitnih stavki (zbir od 1 do 7)	8,984,670	
	Osnovni akcijski kapital: regulatorna prilagođavanja i odbitne stavke		
9	Dodatna prilagođavanja vrednosti (-)	-3,493	đ
10	Nematerijalna ulaganja, uključujući gudvil (umanjena za iznos odloženih poreskih obaveza) (-)	-31,874	е
11	Odložena poreska sredstva koja zavise od buduće profitabilnosti banke, izuzev onih koja prostiču iz privremenih razlika, umanjena za povezane odložene poreske obaveze ako su ispunjeni uslovi iz		
	tačke 14. stav 1. OAK		
12	Fer vrednosti rezervi u vezi sa dobicima ili gubicima po osnovu instrumenata zaštite od rizika novčanog toka za finansijske instrumente koji se ne vrednuju po fer vrednosti, uključujući i		
13	projektovane novčane tokove IRB pristup: negativan iznos razlike dobijen obračunom u skladu s tačkom 134. OAK (-)		
14	Povećanje kapitala koje je rezultat sekjuritizacije izloženosti (-)		
14	Dobici ili gubici po osnovu obaveza banke vrednovanih prema fer vrednosti koji su posledica		
15	promene kreditne sposobnosti banke		
16	Imovina u penzijskom fondu sa definisanim naknadama u bilansu stanja banke (-)		
17	Direktna, indirektna i sintetička ulaganja banke u sopstvene instrumente osnovnog akcijskog kapitala, uključujući i sopstvene instrumente osnovnog akcijskog kapitala koje je banka dužna ili može biti dužna da otkupi na osnovu ugovorne obaveze (-)		
18	Direktna, indirektna i sintetička ulaganja u instrumente osnovnog akcijskog kapitala lica u finansijskom sektoru koja imaju uzajamna ulaganja u banci, a koja su izvršena radi prikazivanja		
19	većeg iznosa kapitala banke (-) Primenljivi iznos direktnih, indirektnih i sintetičkih ulaganja banke u instrumente osnovnog		
20	akcijskog kapitala lica u finansijskom sektoru u kojem banka nema značajno ulaganje (-) Primenljivi iznos direktnih, indirektnih i sintetičkih ulaganja banke u instrumente osnovnog		
21	akcijskog kapitala lica u finansijskom sektoru u kojem banka ima značajno ulaganje (-) Iznos izloženosti koje ispunjavaju uslove za primenu pondera rizika od 1.250 %, a koje banka		
21.1.	odluči da odbije od osnovnog akcijskog kapitala umesto da primeni taj ponder od čega: učešća u licima koja nisu lica u finansijskom sektoru u iznosu preko 10% kapitala tih lica, odnosno učešća koja omogućavaju efektivno vršenje znatnog uticaja na upravljanje pravnim licem ili na poslovnu politiku tog pravnog lica (-)		
21.2.	od čega: sekjuritizovane pozicije (-)		
21.3.	od čega: slobodne isporuke (-)		
22	Odložena poreska sredstva koja zavise od buduće profitabilnosti banke i koja proističu iz privremenih razlika (iznos iznad 10% osnovnog akcijskog kapitala banke iz tačke 21. stav 2, umanjen za iznos povezanih poreskih obaveza ako su ispunjeni uslovi iz tačke 14. stav 1. OAK) (-)		
23	Zbir odloženih poreskih sredstava i ulaganja u lica u finansijskom sektoru u kojima banka ima značajno ulaganje iz tačke 21. stav 1. OAK, koji prelazi limit iz tačke 21. stav 3. OAK (-)		
23.1.	od čega: Direktna, indirektna i sintetička ulaganja u instrumente osnovnog akcijskog kapitala lica u finansijskom sektoru u kojem banka ima značajno ulaganje		
	od čega: Odložena poreska sredstva koja proističu iz privremenih razlika		

24	Cubitalitation for installing the control of the co	F 6F6 440	
	Gubitak tekuće i ranijih godina, kao i nerealizovani gubici (-) Iznos poreza u vezi sa elementima osnovnog akcijskog kapitala koji se može predvideti u vreme	-5,656,110	ž
25	obračuna kapitala, osim ako je banka prethodno korigovala iznos elemenata osnovnog akcijskog kapitala u iznosu u kojem ti porezi smanjuju iznos do kojeg se elementi osnovnog akcijskog		
26	kapitala mogu koristiti za pokriće rizika ili gubitaka (-) Iznos za koji odbitne stavke od dodatnog osnovnog kapitala banke premašuju iznos dodatnog		
	osnovnog kapitala banke (-)		
27	Iznos potrebne rezerve za procenjene gubitke po bilansnoj aktivi i vanbilansnim stavkama banke		
28	Ukupna regulatorna prilagođavanja i odbitne stavke od osnovnog akcijskog kapitala (zbir od 9 do 27)	-5,696,483	
29	Osnovni akcijski kapital (razlika između 8 i 28)	3,288,185	
	Dodatni osnovni kapital: elementi		
30	Akcije i drugi instrumenti kapitala koji ispunjavaju uslove iz tačke 23. OAK i pripadajuće emisione premije		
31	Instrumenti osnovnog kapitala izdati od strane podređenih društava koji se priznaju u dodatnom osnovnom kapitalu**		
32	Dodatni osnovni kapital pre odbitnih stavki (30+31)		
32	Dodatni osnovni kapital: odbitne stavke		
	Direktna, indirektna i sintetička ulaganja banke u sopstvene instrumente dodatnog osnovnog		
33	kapitala, indirektna i sinteticka diaganja banke d sopstvene instrumente dodatnog osnovnog kapitala, uključujući instrumente koje je banka dužna da otkupi na osnovu postojeće ugovorne obaveze (-)		
	Direktna, indirektna i sintetička ulaganja u instrumente dodatnog osnovnog kapitala lica u		
34	finansijskom sektoru koja imaju uzajamna ulaganja u banci koja su izvršena radi prikazivanja		
	većeg iznosa kapitala banke (-)		
35	Primenljivi iznos direktnih, indirektnih i sintetičkih ulaganja u instrumente dodatnog osnovnog		
	kapitala lica u finansijskom sektoru u kojima banka nema značajno ulaganje (-) Direktna, indirektna i sintetička ulaganja banke u instrumente dodatnog osnovnog kapitala lica u		
36	finansijskom sektoru u kojima banka ima značajno ulaganje, isključujući pozicije po osnovu		
	vršenja pokroviteljstva emisije hartija od vrednosti koje se drže pet radnih dana ili kraće (-)		
37	Iznos za koji odbitne stavke od dopunskog kapitala banke premašuju iznos dopunskog kapitala banke	(-)	
38	Ukupne odbitne stavke od dodatnog osnovnog kapitala (zbir od 33 do 37)		
39	Dodatni osnovni kapital (razlika između 32 i 38)		
40	Osnovni kapital (zbir 29 i 39)	3,288,185	
	Dopunski kapital: elementi		
	Dopuliski kapitai. elementi		
41	Akcije i drugi instrumenti dopunskog kapitala i suboordinirane obaveze, koji ispunjavaju uslove iz tačke 28. OAK i pripadajuće emisione premije uz instrumente		
41	Akcije i drugi instrumenti dopunskog kapitala i suboordinirane obaveze, koji ispunjavaju uslove iz

4. CAPITAL REQUIREMENTS AND CAPITAL ADEQUACY

The bank's capital adequacy ratio is equal to the ratio of capital and risk assets of the bank. The supervisory requirement for maintaining the capital adequacy of the Bank is: 7.22% - core share capital adequacy ratio; 9.65% - core capital adequacy ratio; 12.86% - capital adequacy indicator and has been in use since 01.01.2020. The bank is obliged to ensure in its operations that the amount of its capital is never less than the dinar equivalent of EUR 10,000,000, according to the official exchange rate of the National Bank of Serbia.

The Bank shall at all times maintain the capital at the level necessary to cover all risks to which it is or may be exposed in its operations, and at least in the amount of the sum of the following capital requirements:

- Capital requirement for credit risk and counterparty risk for all business activities of the bank and capital requirement for settlement / delivery risk for activities from the trading book capital requirement for credit risk;
- Capital requirement for market risks;
- Capital requirement for operational risk for all business activities.

4.1. CAPITAL REQUIREMENT FOR CREDIT RISK AND COUNTERPARTY RISK

When calculating capital requirements for credit risk and counterparty risk, the Bank shall use a standardized approach, in the manner prescribed by the Decision on Capital Adequacy of the National Bank of Serbia. The Bank uses a simple method to apply credit risk mitigation techniques.

The amount of exposure for balance sheet asset items is equal to the amount of the gross book value of these positions less specific credit risk adjustments, additional adjustments in accordance with item 12, paragraph 5 (Prudent valuation for FV) and item 36 of the Capital Adequacy Decision, the amount required provisions for estimated losses and other impairments in respect of that position.

The exposure amount for off-balance sheet items is equal to the amount of the gross carrying amount of those items less specific credit risk adjustments and the amount of the required allowance for estimated losses and multiplied by the conversion factors.

Exposures subject to the calculation of capital requirements for credit risk are reduced by deductions from:

- 1. share capital,
- 2. additional share capital and
- 3. additional capital

Within the exposures that are subject to the calculation of capital requirements for credit risks, the exposures to which the capital requirements for the risk of the other counterparty are calculated are singled out. Further, it is necessary to break down the exposures into those that represent exposures from the trading book and exposures that belong to the banking book.

The capital requirement for credit risk using a standardized approach applies to:

- 1. exposures from the banking book and exposures from the trading book (if the trading book is materially less significant),
- 2. exposures from the banking book if the trading book is materially significant (namely in that case it applies the capital requirement for price risk to the exposures from the trading book).

Calculated capital requirement for credit risk and counterparty risk in accordance with the Decision on capital adequacy on 31.12.2020. amounts to **RSD 695,846 thousand**.

4.2. CAPITAL REQUIREMENT FOR MARKET RISKS

Capital requirement for market risks - is the sum of capital requirements:

- for price risk for business activities from the trading book,
- for foreign exchange risk for all business activities,
- for commodity risk for all business activities.

The Bank does not have a position within the trading book so it is not exposed to price risk. Also, the Bank does not invest in goods and is not exposed to commodity risk. In its operations, the Bank is exposed only to foreign exchange risk, therefore the capital requirement is calculated only for this type of risk.

4.1.2. CAPITAL REQUIREMENT FOR FOREIGN EXCHANGE RISK

For the calculation of the capital requirement for foreign exchange risk, the Bank applies the approach in accordance with the Decision on the capital adequacy of the bank.

All positions of foreign currency assets and foreign currency liabilities of the bank are subject to the capital requirement for foreign exchange risk, and which include:

- assets and liabilities denominated in foreign currencies,
- assets and liabilities denominated in dinars indexed by a currency clause.

Based on the review of foreign currency assets and foreign currency liabilities, the Bank calculates the net open foreign exchange position, which is the input for calculating the capital requirement for foreign exchange risk.

All positions of the Bank are divided into categories Euro (EUR), US Dollar (USD), Swiss Franc (CHF), Other Currencies and Gold. For each category, the open position is determined as the sum of the net spot position, the net forward position and the option position. If for a certain currency the sum of the above items is greater than zero, the net position in that currency is long; otherwise the position is short.

The Bank's total long foreign exchange position represents the sum of all its net long positions in individual currencies, while the Bank's total short foreign exchange position represents the sum of all its net short positions in individual currencies.

The total net open foreign exchange position of the bank represents the absolute value of the total long, ie total short foreign exchange position, depending on which absolute value is higher.

The minimum capital requirement for foreign exchange risk is calculated by the Bank if the sum of the total net open position and the absolute value of the net open position in gold is greater than 2% of the Bank's capital. Since the Bank does not have positions in gold, they are not considered. By multiplying the total net open foreign exchange position by 8%, we get the amount of capital necessary to cover foreign exchange risk.

Calculated capital requirement for foreign exchange risk in accordance with the Decision on capital adequacy on 31.12.2020. is **RSD 6.712,48 thousands.**

4.3. CAPITAL REQUIREMENT FOR OPERATIONAL RISK

Capital requirement for operational risk - the Bank uses the Basic Indicator (BIA) approach to calculate the capital requirement for operational risk. The minimum capital requirement for operational risk calculated using the Basic Indicator approach is equal to the amount of the three-year average of the exposure indicator multiplied by the capital requirement rate of 15%. The three-year average of the exposure indicator represents the arithmetic mean of the values of that indicator for the previous three years.

If for any of the previous three years, the exposure indicator was negative or equal to zero, this amount is not included in the calculation of the three-year average, but the average is calculated as the ratio of the sum of positive values of the exposure indicator and the number of years of positive values.

Calculated capital requirement for operational risk in accordance with the Decision on capital adequacy on 31.12.2020. amounts to **RSD 97.595 thousand**.

5. INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS

The internal capital adequacy assessment process (ICAAP) is based on the Bank's methodology and is in line with the requirements of the Bank's Risk Management Decision.

ICAAP is a documented process through which the Bank determines total internal capital requirements in accordance with its risk profile and determines available internal capital and performs its distribution.

This process includes the Bank's procedures and measures to ensure adequate identification, measurement, control and management of risks, as well as an adequate level of internal capital in relation to the risk profile of the bank, as well as the implementation and further development of risk management systems.

The Bank will perform a documented process of internal capital assessment in accordance with the regulatory framework - the Decision on Risk Management and the Decision on Capital Adequacy on a continuous basis and report to the National Bank of Serbia on an annual basis within the prescribed deadlines.

ICAAP takes place in a way that ensures that the following conditions are met:

- is based on the process of risk identification and measurement / assessment;
- provides a comprehensive risk assessment, as well as monitoring of all significant risks to which the Bank is exposed or may be exposed in its operations;
- provides an adequate level of available internal capital in accordance with the risk profile of the Bank;
- is embedded in the Bank's management process and decision-making process;
- is subject to regular analysis, monitoring and verification.

The ICAAP is designed and implemented in the following steps:

- identification of the risks to which the Bank is exposed;
- identification of material risks;
- calculation of internal capital requirements for individual material risks;
- determination of total internal capital requirements
- comparison of the following elements:
 - ✓ minimum capital requirements calculated in accordance with the Decision on capital adequacy and internal capital requirements for individual risks, and
 - ✓ sum of minimum capital requirements calculated in accordance with the Decision on capital adequacy and total internal capital requirements;
- stress testing of all material risks and their inclusion in internal capital requirements.

2.2. ROLES AND RESPONSIBILITIES

The following are the bodies and organizational units of the Bank, which have been assigned certain responsibilities in the process of internal capital adequacy assessment.

The responsibilities of the Board of Directors are:

• approves the annual Report on the process of internal assessment of the Bank's capital adequacy to be submitted to the National Bank of Serbia;

The responsibilities of the Executive Board are:

- ensures the implementation of the process of internal capital adequacy assessment and its compliance with the Bank's business policy and strategy;
- analyzes the risk management system and reports at least quarterly to the Bank's Board of Directors on the level of risk exposure and risk management;
- ensures that all employees are familiar with the regulations and other acts of the Bank governing their work obligations.

The responsibilities of the Risk Management Division are:

- defining quantitative and qualitative criteria, on the basis of which they will identify material risks for the needs of the process of internal capital adequacy assessment;
- defining methodologies / approaches for measuring and assessing individual risks in order to implement the process of internal capital adequacy assessment;
- conducting stress tests for all material risks and for internal capital requirements at least once a year, and more often if necessary;
- managing and updating the process of internal capital adequacy assessment, at least once a year, ie whenever the Bank is exposed to new risks and significant changes, and notifies the Executive Board thereof;
- proposes to the Executive Board all changes / amendments to the document regulating the process of internal capital adequacy assessment;
- analyzes and documents the differences between the internal capital requirements thus determined and the minimum capital requirements determined in accordance with the Decision on Capital Adequacy;
- informs the Executive Board of the Bank on the results of the process of internal capital adequacy assessment;
- in cooperation with the Finance Sector, prepares and submits to the NBS a report on ICAAP within the prescribed deadlines.

The responsibilities of the NBS Reporting Department are:

- calculates the Bank's capital, minimum capital requirements and capital adequacy ratio on a monthly basis in accordance with the Decision on the Bank's Capital Adequacy;
- informs the Assets and Liabilities Management Committee on the amount and changes in the amount of regulatory capital, risk assets and the capital adequacy ratio of the Bank.

Internal Audit reviews the internal capital adequacy process within its independent function and submits its findings to the Board of Directors and the Audit Committee.

2.3. MEASUREMENT AND RISK ASSESMENT WITHIN ICAAP

An important prerequisite for analyzing the Bank's ability to bear risks is to assess all material risks to which the Bank is exposed or may be exposed in its operations. The purpose of risk assessment is to show the significance and effects of the risks taken. To ensure that risks are conscientiously and systematically managed in accordance with the ICAAP, it is particularly important to distinguish between relevant risk categories.

In the process of material significance assessment, the above risks are divided into two groups:

- 1. Quantifiable risks in terms of exposure and potential loss (quantifiable risks):
- Credit risk (which includes settlement / delivery risk and counterparty risk)
- Credit and foreign exchange risk
- Credit risk induced by interest rate risk
- Operational risk
- Foreign exchange risk and other market risks
- Residual risk
- Liquidity risk
- Interest rate risk
- Concentration risk
- Investment risks
- Country risk
- Risk of impairment of receivables
- 2. Risks that cannot be quantified from the point of view of exposure and possible loss, more precisely their losses can potentially be quantified, but not the possible exposure:
- Business compliance risk
- Strategic risk
- Reputation risk

Risks for which the Bank calculates minimum capital requirements in accordance with the Decision on capital adequacy (credit risk, including counterparty risk and settlement / delivery risk, market risk and operational risk) are considered materially significant without additional assessment, given that the Bank for they already determine the capital requirements as well as the available capital and distribute it.

For quantifiable risks, the assessment of material significance is based on quantitative criteria, which will be listed under certain risks.

For risks that cannot be quantified (business compliance risk, strategic, reputational), the Bank calculates the reserve in the form of additional internal capital requirements. The reserve is set as a fixed percentage of total internal capital requirements for risks that are material and can be quantified.

2.4. INTERNAL CAPITAL AND CAPITAL DISTRIBUTION

2.4.1. INTERNAL CAPITAL REQUIREMENT FOR CREDIT RISK

To calculate the internal capital requirement for credit risk, the Bank has chosen a standardized approach within the first pillar of the Basel III standard for calculating the minimum capital requirement for credit risk.

The amount of the assessment of possible underestimation of the internal capital requirement for credit risk due to the application of the standardized approach is determined by the Bank by applying the modified standardized approach in accordance with the Decision on the capital adequacy of the bank. Modification of the standardized approach implies the application of more conservative credit risk weights for individual items of on-balance sheet assets and off-balance sheet items and conversion factors in relation to those defined by the Decision.

2.4.2. INTERNAL CAPITAL REQUIREMENT FOR FOREIGN EXCHANGE RISK

For the calculation of internal capital requirements for foreign exchange risk, the Bank applies a standardized approach in accordance with the Decision on the capital adequacy of the bank, taking into account the current currency structure of the balance sheet.

The amount of the possible underestimation of the internal capital requirement for foreign exchange risk due to the application of the standardized approach is determined by the Bank using the modified standardized approach.

2.4.3. INTERNAL CAPITAL REQIREMENT FOR OPERATIONAL RISK

To calculate the internal capital requirement for operational risk, the Bank applies the Basic Indicator (BIA) approach, which is also used to calculate the minimum capital requirement in accordance with the Bank's Capital Adequacy Decision and the Methodology for calculating the capital requirement for operational risk.

The minimum capital requirement for operational risk calculated using the BASIC INDICATOR approach is equal to the amount of the three-year average of the exposure indicator multiplied by the capital requirement rate of 15%.

The Bank evaluates the possible underestimation of the internal capital requirement for operational risk due to the application of the basic indicator approach by calculating the internal capital requirement as an amount of 15% in relation to the calculated regulatory capital requirement for credit risk. Calculated internal capital requirements for operational risk as of 31.12.2020. is equal to the regulatory one and amounts to 167,786 thousand dinars.

2.4.4. INTERNAL CAPITAL REQUIREMENT FOR CREDIT-FOREIGN EXCHANGE RISK

For the purposes of measuring / estimating internal capital for credit and foreign exchange risk, the Bank applies the FXAOF factor (FX add-on factor) which adjusts the internal capital requirement for credit risk.

3.1.1. INTERNAL CAPITAL REQUIREMENTS FOR INTEREST RATE RISK

The Bank determines the material significance of interest rate risk in the banking book based on the share of the absolute marginal gap by time zones in total balance sheet assets.

3.1.2. INTERNAL CAPITAL REQUIREMENT FOR LIQUIDITY RISK

The internal capital requirement for liquidity risk is calculated if in the previous period of one year, the Bank's liquidity ratio (calculated in the manner defined by the Risk Management Decision) was less than 1.2 for one business day.

4. PROTECTIVE LAYERS OF CAPITAL

The Bank has no significant exposures in order to calculate the countercyclical capital buffer.

5. INFORMATION RELATED TO THE BANK'S EXPOSURE TO RISKS AND MEASUREMENT APPROACHES, OR RISK ASSESMENT

5.1. EXPOSURE TO CREDIT RISK AND COUNTERPARTY RISK

5.1.1. DEFAULT STATUS

The default status of a particular debtor exists when any of the following conditions are met:

- a) The Bank considers it unlikely that the debtor will fully settle its obligation to it, regardless of the possibility of collection based on the activation of collateral, and at least taking into account the following:
- cessation of interest calculation in accordance with the bank's internal acts,
- partial or complete write-off of receivables or calculation of impairment of balance sheet assets and provisions for losses on off-balance sheet items on an individual basis,
- restructuring of receivables due to deterioration of the financial condition of the debtor,
- failure of the debtor to comply with the adopted reorganization plan in terms of the law governing the conditions and manner of initiating and conducting bankruptcy proceedings against legal entities,
- bankruptcy or liquidation of the debtor,
- financial difficulties of the debtor the financial condition and creditworthiness of the debtor jeopardize the ability to collect receivables,
- b) the debtor settles obligations with a delay of more than 90 days in a materially significant amount.

5.1.2. ASSESSMENT OF IMPAIRMENT OF FINANTIAL ASSETS

At each reporting date, the Bank identifies financial assets for which the allowance will be calculated on an individual basis (individual assessment - individually significant exposures).

The criteria for identifying receivables that must be assessed on an individual basis are:

- 1. The identified status of non-payment of obligations, ie. default status;
- 2. All financial instruments that meet the definition of POCI in accordance with IFRS 9;
- 3. Exposure to banks classified in V, G and D;
- 4. Exposures with FB / NPE status;
- 5. Amount of receivables per debtor.

In accordance with these criteria, receivables that must be assessed on an individual basis are receivables from the following debtors:

- a) banks classified in categories V, G and D where the total value of exposure to the bank exceeds EUR 200,000, on the day of settlement;
- b) legal entities and entrepreneurs with which the total value of exposure per debtor exceeds EUR 40,000, on the day of calculation;
- c) natural persons with an exposure above EUR 30,000, on the day of calculation.

Individually significant exposures - The Bank assesses at each reporting date whether there is objective evidence that a financial asset is impaired (impaired). A financial asset is impaired and an impairment loss is recognized only if there is objective evidence that it is impaired as a result of one or more events that occurred after the initial measurement of the asset.

The criteria used by the Bank to determine whether there is objective evidence of impairment include:

- 1. the financial condition of the debtor indicates significant problems in its operations such as a change in the classification of the debtor; the debtor is late in settling obligations to the state, other creditors or to employees or irregularly fulfills obligations based on taxes and social security contributions of employees, in a significant amount, at the discretion of the bank; significant and continuous reduction of operating revenues in the previous two years; the debtor's capital was significantly reduced (more than 50%) due to losses during the previous two reporting periods; there is a materially significant decrease (more than 50%) in operating income;
- 2. there are data on non-payment of obligations, frequent delays in repayment of interest and / or principal or non-compliance with other contractual provisions; at the latest when the debtor is 90 days late on the basis of any placement; placement is problematic in accordance with the Decision on the classification of balance sheet assets and off-balance sheet items of the bank;
- 3. The bank has significantly changed the terms of repayment of placements due to financial difficulties of the debtor in relation to the originally agreed. that is, clients who are in the status of NPE / RES, in accordance with items 35a to 35d of the Decision on the classification of balance sheet assets and off-balance sheet items of the bank for problematic claims of the bank;
- 4. It is certain to initiate bankruptcy proceedings against the debtor or initiate another type of financial reorganization, which can be identified on the basis of: the debtor is blocked for more than 60 days on the day of assessment; the debtor is in the process of liquidation; a court proceeding (lawsuit) has been initiated against the debtor; pre-bankruptcy proceedings have been initiated against the debtor or bankruptcy proceedings are underway against any strategically important member of the economic entity to which the debtor belongs; the reasons for initiating bankruptcy proceedings against the debtor, which are defined by the law governing bankruptcy, have been met; the debtor is in the process of preparing the reorganization plan / the creditors have accepted the proposed reorganization plan / the debtor is operating according to the adopted reorganization plan; or the debtor is in the process of consensual financial restructuring in accordance with the relevant regulation;
- 5. other objective evidence of impairment which classifies receivables from the client in the category of doubtful and disputable receivables.

If the Bank determines that there is objective evidence that a financial asset is impaired, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows.

The Bank recognizes the existence of several possible collection scenarios when estimating expected future cash flows.

On this occasion, the scenarios that are taken into account are:

- realization of collateral (then separately judicial and extrajudicial),
- restructuring and reprogramming,
- bankruptcy,
- sale of receivables,
- anything else it deems relevant

When determining the probability estimates of certain scenarios, the Bank is guided by the history of realization and collection of problem receivables, but also by the specifics of individual financial instruments and accordingly assigns them appropriate weights, which must be 100% of all scenarios.

In this way, the final accrued credit losses meet the definition of the standard in a way that represents the probability of a weighted estimate of credit losses.

Depending on the type of real estate over which the mortgage has been established, the location where it is located and the date of the last appraisal, the Bank uses the reduced market value of the real estate in the process of calculating the value adjustment, as follows:

Stambena imovina			
Teritorija	Haircuts	Godina naplate	
Beograd	20%	1-5	
Novi Sad	20%	1-5	
Drugi gradovi sa više od 50.000 stanovnika	30%	1-5

Assessment on a group basis-level 1,2,3

The Bank considers the following receivables on a group basis:

- receivables for which an individual review has shown that there is no objective evidence of impairment;
- receivables that belong to the group of small receivables and which are not considered on an individual basis.

For the purposes of calculation on a group basis, receivables in the Bank's loan portfolio are grouped on the basis of similar characteristics from the aspect of credit risk.

Level 1 - expected credit losses

The calculation of the allowance under Level 1 is performed if at the reporting date the credit risk of the financial instrument has not increased significantly since initial recognition. The Bank measures the loss provision for this financial instrument at an amount equal to the most expected twelve-month credit loss.

The expected credit loss recognized for Level 1 financial instruments is accounted for as a one-year portion of accrued credit losses as follows:

ECL = EAD * MPD * LGD * DF

ECL Expected credit loss EAD Exposure at default

MPD Marginal Probability of default

LGD Loss given default

DF EIR based discount factor

Thus calculated, expected 12-month credit losses are part of expected credit losses over the life and represent cash deficits over the life that will result if default occurs within 12 months after the reporting date (or a shorter period if the expected life of the financial instrument shorter than 12 months), weighted by the probability of such default.

Level 2 - expected credit losses

At the reporting date, the Bank measures the impairment of a financial instrument at an amount equal to the expected credit losses over its life, if the credit risk for that financial instrument has increased significantly since initial recognition.

The Bank's general approach to calculating expected credit losses for the entire life of a financial instrument is presented by the formula:

$$ECL = \sum_{t=1}^{T} (EAD_t * MPD_t * LGD_t * DF_t)$$

ECL Expected credit loss EAD Exposure at default

MPD Marginal Probability of default

LGD Loss given default

DF EIR based discount factor

The expected credit losses calculated in this way for the entire period of the financial instrument represent the losses that the Bank recognizes for the purposes of calculating the allowance for level 2.

Level 3 - expected credit losses

The calculation of impairment under Level 3 is performed if the criteria for identification of receivables are recognized, which must be assessed on an individual basis but are below the defined materiality threshold.

For Level 3 Group Debtors, the calculation of expected credit losses is calculated as the difference between the gross carrying amount of the placement and the value obtained by discounting all available collateral at the initial effective interest rate, as well as taking into account out-of-collateral collection (1-LGD unsecured).

The value of the collateral that is discounted is 90% of the allocated value after applying the haircut. An average collection of 36 months is taken as the discount period.

5.2. EXPOSURE TO MARKET RISKS

The Bank does not apply the approach of internal models for calculating capital requirements for market risks, so all information on market risks relevant to disclosure is covered through the previous segments of this instruction.

5.3. EXPOSURE TO OPERATIONAL RISKS

The Bank does not apply an advanced approach to calculating capital requirements for operational risks, so all information on operational risks relevant to disclosure is covered through the previous segments of this document.

5.4. EXPOSURE TO INTEREST RATE RISK

Interest rate risk management is based on a regulatory approach, ie on the application of requirements defined by the NBS.

In order to manage the exposure to interest rate risk, the Bank uses the GAP interest rate methodology, which represents the difference between interest rate sensitive assets and interest rate sensitive liabilities within defined time zones, showing how the two sides of the balance sheet react to changes in interest rates.

Positions are arranged according to:

- maturities (for fixed rate positions) or
- time remaining until the next change in the interest rate (for positions with variable interest rates).

Exposure to interest rate risk is monitored on a monthly basis in domestic currency and in EUR, CHF, USD, cumulatively for other currencies but also at the consolidated level (consolidated for all currencies at the Bank level).

Limits for GAP interest rates are defined by the Decision of the competent bodies of the Bank, they are regularly monitored and analyzed. The Gap Interest Rate Report is presented to the ALCO Board.

As an integral part of the interest rate risk assessment, the Bank conducts stress tests of the effects of changes in interest rates. In determining the exposure to interest rate risk in the banking book and the limit of this risk, the Bank assesses the effects of interest rate changes on the financial result of the Bank (income statement), as well as on the economic value of the Bank, applying the standard interest shock test. is exposed.

The standard interest rate shock represents a positive and a negative parallel shift of interest rates by 200 basis points (1bp = 0.01%).

In the existing structure of interest rate GAPs (observed at the consolidated level, which includes significant currencies, ie EUR, RSD, CHF and USD), an increase in the interest rate by 200 bps will cause a change in the economic value of capital on 31.12.2020 by 11.18% or RSD 367,712 thousand.

5.5. EXPOSURE BASED ON EQUITY INVESTMENTS IN THE BANKING BOOK

Equity investments in the banking book date from the period of the previous owner of the Bank and include investments in financial institutions.

Investment structure:

Name	Value at the time of acquisition	Number of shares	Book value on day 31.12.2020 (in RSD)
Money market	373,853	3	372,160
Belgrade stock exchange	102,000	10	96,792
Total	475,853		468,952

Having in mind that unlisted legal entities do not prepare periodic financial reports, deposits are kept in books according to the book value of the share in accordance with the last annual calculation, based on a certificate issued by the legal entity, the issuer of shares. The securities have the status of free for sale.

6. LEVERAGE INDICATOR

In accordance with the Decision on the capital adequacy of the bank, the Bank calculates the Leverage indicator as follows: as the ratio of share capital to the amount of the bank's exposure.

The Leverage indicator in accordance with the Decision on capital adequacy as of 31.12.2020 was 14.67%. Below is a table showing the Leverage indicator:

Vrste izloženosti	iznos izloženosti

9. Receivables secured by a mortgage on real estate per values of LTV indicator

	in 000RSD
Value of LTV indicator*	Value of receivables secured mortgage on real estate
Below 50%	2,633,221
From 50% to 70%	2,026,743
From 70% to 90%	974,628
From 90% to 100%	62,516
From 100% to 120%	130,973
From 120% to 150%	101,749
Over 150%	195,102
Total	6,124,932
Average LTV indicator	58.86%

^{*} LTV indicator represents the ratio of the gross value of the receivable and the market value of the real estate by which the receivable is secured

10. Data on changes in assets acquired through collection of receivables

Types of assets acquired through collection of receivables		Residential real estate	Other real estate	Financial assets	Other assets acquired by collection	Total
Gross value at the beginning of the period *	1	38,588,701	499,050,451	0	0	537,639,153
Acquired during the period	2	22,099,631	16,160,223	0	0	38,259,854
Sold during the period	3	0	0	0	0	0
Put into operation during the period (e.g. fixed asset or investment property Reclassified as assets held for sale	4 5.6	0 6,068,041	76,360,843 0	0 0	0 0	76,360,843 6,068,041
of which: sold during the period		6,068,041	0	0	0	6,068,041
Impact assessment	7	127,315	19,213,624	0	0	19,340,939
Gross value at the end of the period	8 (1+2+3-4-5-7)	54,492,977	419,636,207	0	0	474,129,184
Accumulated value adjustment	9	0	0	0	0	0
of which: value adjustments over the period	10	0	0	0	0	0
Net value at the end of the period	11 (8-9)	54,492,977	419,636,207	0	0	474,129,184

^{*} The term "period" means the calendar year for which the regular annual financial report is complied and to which the said disclosures relate; or the shorter time period, depending on the determined frequency of publishing data and information by the bank.

11. Changes in impaired receivables in 000 RSD

	Gross value at the beginning of the year	Receivables that are impaired during the year of which: impaired on an individual basis		of which: used to be		Exchange rate effect	Other changes *	Gross value at the end of period	Net value at the end of period
